Workpointe

COVID19 Workplace Solutions

> Changing Times

The COVID19 Coronoavirus pandemic has introduced us into a world we never imagined. During these unprecedented times we have all been asked to learn to adapt to a new normal. The return to the office will be a challenge and Workpointe is here to help you navigate what that might look like.

Our industry has been moving towards open-office collaboration for years now and unfortunately with COVID19 that is the exact opposite of what we need right now. Fortunately, several innovative manufacturers have developed solutions that can apply social distancing, easily cleanable, and simple installation to existing workspaces. For minimal investment you can keep your employees safe and your business running successfully.

> Essential Supplies

Essential Supplies

As we get ready to return to work or school, we have all the supplies you may need to keep you, your employees, colleagues, students and clients stay safe.

Hand sanitizer, disposable masks, touchless sanitizer dispenser, antiseptic wipes, antimicrobial wipes and back to work kits.

> KI | Height Adjustable Screens

Desk Screens

Made of PET material for sound absorption, these screens can be used as modesty screens or dividers (or both at the same time) and can be moved up and down throughout the day with a push or pull of the fingers. Easily user-adjustable

> EzoBoard | Desk Separators

Desk Screens

We have plenty of work separation products that will create physical distancing in minutes. With minimal hardware, these products can be installed quickly to create isolated work spaces for your employees. Slide-on desk separators, tall desk screens, and floor-to-ceiling work zone dividers will give you the separation needed. And all with great acoustic performance too!

> 3Form | Desk Wrap

Desk Screens

These easy to clean partitions integrate seamlessly into existing office layouts to divide personal workspaces. Enhance safety without compromising design. These space saving screens attach directly to your work surface and onto desks to fit into existing offices. Made from Varia, the same material used for healthcare applications, these dividers offer durability and can be easily disinfected. Varia is available in a wide range of color & patterns to fit your design aesthetic.

> Watson | C9 Screen

Desk Screen

The Watson C9 screen is made of translucent acrylic which is perfect for disinfecting. It can be added to any existing worksurface with varying thicknesses. It is available in 19" or 24" heights. The screen bracket simply slides over the desk surface and clamps tight from below for easy installation.

> LOFTwall | Screens

Desk Screens

Quickly and securely separate space in any environment with Desktop Shields. Completely recycle-able, Counter Shield can stand up to harsh cleaners to ensure a sanitary environment for all customers. Available in frame and frameless. Screens can anchor to a surface or be free standing. Product can be cleaned with healthcare-grade cleaners. Multiple screens can be linked together. Product can be assembled in less than 5 minutes and adapted to existing work environments.

> KI | Tattoo Screens

Freestanding Screens

Tattoo offers both Flex and Spine screens. Flex screens are easy to move, so you can expand or contract workstations for either individual focus or team interaction. Spine screens support in-line planning with or without power and data. Both screens feature a unique base design, which allows screens to stand independently. A variety of screen inserts can be added to enhance aesthetics, acoustics and function. Clear plexi, PET acoustical, markerboard, laminate, and acrylic are all options for this versatile screen.

> Clarus Glassboard | goMobile!

Freestanding Screens

The goMobile! screens help supply function while creating privacy. Available in glass markerboard (which can hold up to some of the harshest cleaners) or PET acoustical material. Available in metal or wood frame and thousands of glass color options. The goMobile board will look beautiful in your new space.

> Teknion | Zones Screens

Freestanding Screens

Teknion Zones screens can operate as dividing partitions or used to create enclosures for private workspaces. Made of laminate or wood, the product can easily be wiped down with disinfectants and look great too!

> Clarus Glassboards | TherMobile

Thermometer Protection

During the current COVID-19 pandemic, essential businesses are facing health and safety challenges like never before. That's why Clarus transformed their mobile product with a shield and cutout so employers can take temperatures at a safe distance.

Antimicrobial, Non-porous Glass the TherMobile's shield provides an extra layer of protection during the screening process. Due to its antimicrobial properties, TherMobile's glass inhibits the growth of bacteria and allows for its surface to be wiped clean. With a four-wheel base, TherMobile is adaptable and can be moved around to any location, making it easy to safely take temperatures anywhere in your facility.

> Peter Pepper Products | Healthfirst

Sanitize Stations

Healthfirst products promote the use of personal protection products, reducing the risk of cross contamination.

Freestanding Infection Control Centers are perfect for public waiting and reception areas, providing a single enclosure for dispensing sanitizer, masks and tissues with poster area for health related messages.

PPE products are also secured within the station so cannot be moved elsewhere or removed all together.

> MityBilt | SaniTower

Sanitize Stations

Hands-free sanitize station. The SaniTower includes a 1 liter bottle and when you step on the pedal at the base of the unit, the sanitizer is dispense, keep your hands completely free.

> Takeform | Purify

Sanitize Stations

From hospitals to schools to offices, sanitizer dispensers occupy nearly every public space. Unfortunately, these units often look like unsightly afterthoughts. Not so with Additions. Specify from limitless finish options, leaving visitors and staff with the protection they need and a fresh impression of your space and your brand.

Takeform offers a range of station configurations to fit the functionality you need. Disinfectant. Sanitizer wipes. Gloves. Masks. Tissues. Gowns. All an ADA-compliant 3.9" extending from the wall.

> Pallas Textiles | Bleach Cleanable Fabrics

Fabrics

We have a wide variety of bleach cleanable fabrics in hundreds of colors, patterns, textures and price ranges. New furniture can be upholstered with the fabric directly or you can even buy yards of the fabric to reupholster existing products as well.
